

Kappa Data

NG Firewall
as a Service

The Flexible Firewall Platform

Kappa Data offers the Barracuda Control Center platform-as-a-service allowing you to manage, control, monitor and maintain your Barracuda NG firewalls in a very easy and flexible way. Additional Firewall Care services are available in case you want to be prepared for any upcoming emergency.

Control Center

A flexible and low maintenance one-stop firewall management platform. This tool allows you and your customers to manage, control, monitor and maintain your Barracuda NG Firewall install base in a very easy and flexible way.

Firewall Care

This new service reinforces the continuity of your Firewall infrastructure. Firewall Care is available in your time of need, when your hardware defects. Kappa Data offers you a speedy and no-fuss replacement service to get you back online in no time. On top, we pre-populate your settings to the new device and handle the exchange.

SOLUTIONS

Control Center Service

NEW BUSINESS OPPORTUNITY

The Barracuda Control Center is an Enterprise level management system that gives partners easy access to all connected firewalls. Kappa Data's Control Center Service model eliminates the needs to invest in expensive full featured licenses and support while providing all the benefits at an attractive price.

EASY TO USE PLATFORM

The Barracuda NG Firewall as a service provides one central platform from which you can manage your firewalls, or where Kappa Data can manage it for you. Push new policies on-the-fly, across dozens of devices, schedule upgrades and updates at your own pace with this easy-to use platform.

FOLLOWS YOUR IDENTITY

The per-firewall licensing model lets you start with 1 firewall, and grows together with you to the next level.

NO FIREWALL EXPERTISE? NO PROBLEM!

We'll train you to become a firewall expert. And when in need of a refresh or advanced training, our trainers are available for programs on demand.

Kappa Data is official Barracuda Authorized Training Center, which allows you to obtain official Barracuda certification.

Firewall Care

VERY INCLUSIVE PACKAGE

The license includes the Firewall Control Centre, helpdesk and the advanced Firewall Care service. This time efficient Plug 'n Play solution assures advanced replacement of your firewall within hours (conditions apply). On top, Kappa Data takes care of the administrative fuss of the exchange claim at Barracuda.

SPEEDY DELIVERY

A perfect fit for any situation. Depending on your request, you can choose between 3 formula's: standard delivery, express delivery or pick-up at the Kappa Data Warehouse. Note: conditions apply for shippings outside BENELUX.

PLUG 'N PLAY

This Firewall Care service provides you with a ready-to-plug-in Barracuda NG Firewall device, assuring a quick recovery from hardware failure. Kappa Data pre-configures your last saved firewall settings, assures a 30-day temporary license and handles the administrative process with Barracuda to validate your request and transfer your original license. Your part? Claim an RMA via kappadata.eu and send the faulty device to Kappa Data within 5 business days.
