

TRAINING: Juniper Switching

Juniper offers carrier-class switching solutions for converged enterprise branch offices, campuses, and data centers. These switches combine the carrier-class reliability of modular systems with the economics and flexibility of stackable platforms, delivering a high-performance, scalable solution.

WHAT CAN YOU LEARN IN THIS TRAINING?

In this training you'll learn how to configure, monitor and troubleshoot the various switching components of the Juniper switches that are typically used in today's environments.

The training includes the following topics:

- Product Overview
- Junos Introduction
- Switching basics
- Aggregated Ethernet
- VLAN
- Spanning Tree Protocol
- Switching Security
- Virtual Chassis

Audience

This technical training is intended for resellers and end-users that are new to the Juniper EX switching platform, and wish to be introduced to EX switching series.

Prerequisites

This training requires the use of your own laptop. An Ethernet port on your device is required to participate in the lab exercises.

Objective

In this training you'll learn how to configure, monitor and troubleshoot the various switching components of the Juniper switches that are typically used in today's environments.

SOLUTIONS

- **PLAN**
- **CONFIGURE**
- **MONITOR**
