

# Wi-Fi Technology & Best Practice Training

With the growing need of WI-FI today, more and more issues arise. To counter these issues successfully, some basic knowledge of the technology is required.

## WHAT CAN YOU LEARN IN THIS TRAINING?

This training helps you implement the best practices of Wi-Fi Technology. At the end of the day you will know what to do and certainly what not to do, what is achievable with Wi-Fi and what isn't.

### Audience

This training is intended for any technician who is involved with Wi-Fi technology including WIFI oriented presales.

### Agenda

This training includes a complete overview about WIFI technology and is vendor independent. Following some of the main topics that will be discussed during this training:

- 802.11 standards
- Radio Frequency
- Wireless CSMA – How it actually works!
- WIFI speed
- Antennas
- Security and roaming
- Tools and troubleshooting
- Best practices
- 802.11ax – the new standard

### Practicalities

Lunch is included in the training as well as refreshments.

### Trainer

Dries Velle

### Evaluation

Evaluation is a continuous process by Kappa Data, so your feedback will be asked during the training. At the end of the training you will also receive a full survey where you can add your feedback.

## SOLUTIONS

- RADIO FREQUENCY
- WIRELESS CSMA
- SECURITY & ROAMING
- 802.11 STANDARDS
